

JETSTAMP 990

After our long standing success with the jetStamp series – 790, 792, 790MP, and 792MP; Reiner has introduced the NEW 990 model which replaces all four! The robust 990 consolidates both series into a single powerful unit. Both quick-dry and water based ink cartridges are compatible with this unit. The 990 offers rechargeable battery and plugin options within the same unit. This unit is compact and flexible with the ability to print on virtually any absorbent and non-absorbent surface. With the 990 you can print on to small, curved, & uneven packaging. Print one or two lines of customizable alphanumeric text on plastic, glass, metal, coated cardboard, etc. Intuitive operation, zero-maintenance cartridge based system, and Reiner's industry unique self-traversing printhead enables you to hit the same spot every time.

FEATURES

- Handheld inkjet printer – Thermal Inkjet (TIJ)
